FEATURES • BENEFITS

Provides premium quality water to high flow fountain, coffee and ice machines

Sanitary cartridge replacement is simple, quick and clean; internal filter parts are never exposed to handling or contamination

Proprietary Fibredyne™ II filtration media effectively inhibits the growth of bacteria on the filter media that can decrease product life

Extended-life 7FC Cartridges feature balanced chemical and mechanical reduction for optimum performance in varying water qualities

Exclusive Fibredyne II submicron technology provides superior chlorine taste & odor reduction and micro-filters dirt and particles as small as 0.2* micron in size by mechanical means

Reduces chlorine taste & odor and other offensive contaminants that can adversely affect the taste of beverages

Increases the overall efficiency of foodservice equipment

Optimal flow rate and contaminant reduction capacity with prefiltration for maximum performance

SR-X Feeder with SS-XL ScaleStick® cartridge inhibits scale buildup in ice machines and coffee brewers

NSF/ANSI Standard 53 certified to reduce cysts such as *Cryptosporidium* and *Giardia* by mechanical means

INSTALLATION TIPS

Choose a mounting location suitable to support the full weight of the system when in operation.

Use 3/4" water line.

Fountain equipment connections are made to the outlet part of the system before the SR-X System.

Coffee brewer and ice machine connections are made after the SR-X Feeder; a tee is required.

Install vertically with cartridges hanging down and allow 2½" (6.35 cm) clearance below the cartridge for easy cartridge replacement.

Flush cartridges by running water through system for five (5) minutes at full flow.

OPERATION TIPS

Replace cartridge when flow rate becomes inconveniently slow or before rated capacity is reached. It is recommended to replace cartridge at least once per year.

Change cartridges when capacity is reached or when pressure falls below 10 psi (0.7 bar).

Change SS-XL Cartridge before Hydroblend™ compound is completely used up.

Change Everpure EC210 Prefilter Cartridge when excessively dirty.

Always flush the filter cartridge at time of installation and cartridge change.
