

UNDER-SINK WATER DISPENSER SERIES

BUBBLE INSTANT HEATING HOT AND AMBIENT WATER DISPENSER

LLS-SF6-U: Instant hot and ambient water dispenser (under-sink)

LLS-SF6-U-MU: Main Unit for LLS-SF6U

LLS-SF6-U-DF: Digital Faucet for LLS-SF6U

Transform your kitchen with the Intelligent Instant Heating Water Dispenser, a sleek and compact appliance (≤40 cm). Using **nano rare earth thick film heating**, it reaches **95°C in just 3 seconds** with a powerful **3000 W** element eliminating the need to keep re-boiling water and saving both time and energy.

The unit's **patented intelligent touch faucet** offers **120° rotation**, so you can direct water flow precisely where you need it. With **multi-level temperature** (four presets temperature plus ambient) and **four preset water volumes**, it delivers the exact amount and heat you want, automatically stopping when the set volume is reached. Whether it's a morning glass of milk, an afternoon espresso, or delicate flower tea at party, one touch is all you need.

Safety is paramount: the **anti-dry burn** system automatically cuts power if water runs out, and **water-electricity separation** prevents any risk of short circuiting. A **child safety lock** further guards against unintended hot water dispensing, simply press and hold for two seconds to unlock.

For ultimate hygiene, a **built-in LED UV-C sterilization lamp** destroys up to 99% of microorganisms such as bacteria, viruses, spores, and other pathogens, preventing secondary contamination inside the machine. The result is **double purification**: first through your under-sink filter, then via UV light—so every drop you drink is as pure as it is hot.

Designed with **perfect curvature** and a minimalist silhouette, this machine complements any modern or traditional kitchen aesthetic. Striving for excellence in every detail, it brings smarter living and a refreshed drinking experience to your home.

WARNING: For Drinking Water Applications, do not use with water that is microbiologically unsafe or of unknown quality without adequate disinfection before or after the system.

FEATURES & BENEFITS

- 3-second instant heating
- 4 pre-set temperature(±2°C): 45, 65, 85 & 95°C and ambient water
- 4 pre-set water volume (200, 300, 500 & 999ml)
- UV sterilization 99% microorganism elimination
- Anti dry-burn protection
- Compact 40 cm, space-saving design
- Water-electricity separation ensures safety, prevents electric hazards
- Child safety lock
- Smart touch faucet with 120° rotation

SPECIFICATIONS

Model: LLS-SF6

Temperature Settings (±2°C): ambient water, 45, 65, 85 & 95°C

Water Volume Settings: 200, 300, 500 & 999ml

Heating Power: 3000W

Rated Voltage / Frequency: 220V 50Hz

Min. Operating Pressure: 14.5psi

Flow Rate: 0.7—1.9 Lpm

Inlet Water Temperature: 25°C

Dimensions:

- Under sink dispenser: D400 x W130 x H370mm

- Faucet Dimension: H280 x D180 x W40mm

- Hole Dimension:Φ 30mm

**water filter system sold separately.*

WARRANTY

BUBBLE Division warrants to the original purchaser-consumer of its products that are free from defects in materials and workmanship for a period of six months or one year (when used with a scale-inhibitor filter from Everpure) from the date of purchase. Refer to detailed warranty statement.
